

Information for Authors (revised 1st December 2012)

The journal **INGINERIA ILUMINATULUI - Journal of Lighting Engineering** has a scientific presentation and content, targeted to the continuing education in the lighting field, without commercial advertisings inside of its pages. The objectives of the journal consist of the presentation of the results of the lighting research activity, the dissemination of the lighting knowledge, the education of the interested people working in public administration, constructions, designers, dealers, engineers, students and others.

The responsibility for the content and the English language of original papers rests solely with their authors.

The opinions of the authors, references and collaborators are personal and do not necessarily coincide with those of the editor.

The journal is structured in the following parts, the same being the submitted contributions: Editorial, Papers, Theses and Dissertations, Conferences and Symposiums, Information, Anniversary.

Research papers describe original theoretical and laboratory/experimental investigations.

Manuscripts should be as concise as possible.

The editors reserve the right to reject any manuscript that is not completely legible or does not conform to the standards given in the Instructions for authors.

All papers are independently reviewed by two peer reviewers. The editor-in-chief has the exclusive right to assign papers to members of the editorial board for their peer review process. The reviewers fill in due time a standard evaluation form. The reviewers' suggestions or requests for modifications are anonymously communicated to the authors. The final acceptance of the paper is conditional on authors addressing the anonymous referee comments.

The authors will be provided with a free copy of the journal, after publication.

The journal is available as PDF file in electronic format, with all the figures in their original colour:
